# CONSTRUCTION OF LAST *AND* BEDDING

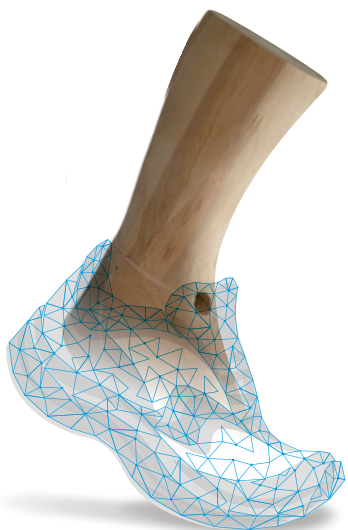

**We** **help**

# DIGITAL PROCESSES IN ORTHOPAEDIC SHOE TECHNOLOGY

More time for patient consultations thanks to a digital workflow with high-quality results. We want to support you as much as possible with the 'digital last and bedding construction' and take another step into the digital environment with you!

# FOUR SIMPLE STEPS TO THE PERFECT RESULT

**1.**

## **Patient data collection**

Blueprint and measurements optionally with 3D scan, virtually constructed last (STL) or cast shell

**SUBMIT ORDER**

**2.**

## **Digital construction of your patient data**

**3D MODEL IS CREATED**

**3.**

## **Digital draft**

**CHECK AND APPROVE**

**4.**

## **Production and delivery**

**ORDER IS DELIVERED**

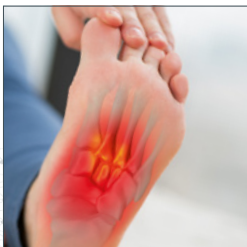

**Training** (in-house or online) on the subject can be booked at any time. This makes it even easier to get started in the digital environment and ensures transparency for you and your patients!

**TIP**

Schein Orthopädie Service offers a 3D scanner including iPad. You can save additional time and process steps with the newly developed Schein-Scan app, which has a direct interface to the CMS ordering system. The information is automatically forwarded and processed!
